

Language Science Press

Open Slavic Linguistics

The series aims to publish high quality books with a focus on Slavic languages on the empirical side, which at the same time reflect the state of the art and current developments in general linguistics. This includes, e.g., theoretical work on Slavic linguistic phenomena, possibly cutting across subdisciplines, advanced empirical/experimental work on Slavic languages, introductions to the linguistics of a certain Slavic language, as well as linguistic handbooks or companions. The defining characteristics of the series is that it seeks a solid grounding in up-to-date theoretical and empirical methods, fosters mutual understanding of linguists across object languages and subdisciplines, and seeks to contribute both to narrowly defined Slavic linguistics and to general linguistics and linguistic typology.
