

Language Science Press African Language Grammars and Dictionaries

African Languages are still among some of the least documented languages in the world. One of the aims of this series is to contribute to rectifying this state of affairs by focusing on the description, analysis, and documentation of languages within the African continent and contact languages within the African Diaspora. A distinctive aspect of this series is that each contribution is either (i) a comprehensive grammar, along with a (bilingual) lexicon as an appendix or (ii) a comprehensive monolingual or bilingual dictionary along with a sketch of the grammar of the language in question as an appendix.
