Our philosophy is that book publishing can be fully under the control of scholars because most of the traditional tasks of commercial publishers can be done more efficiently by scholars

For some time now, all scholars have been accustomed to sharing their materials at no cost with their colleagues, often with the help of services like Academia.edu and ResearchGate. Scientific publication thus no longer serves the need of disseminating research results – its purpose is to make the best work prominent enough to help build careers and to guide scholars in choosing what to read. This task of selecting the best work is carried out by the series editors of Language Science Press.

Language Science Press is a scholar-owned press. We currently have 14 series with editorial board members from all over the world.
